

ARO is a mobile app platform simply and exclusively dedicated to featuring all restaurant offers and promotions (like happy hours, brunch, and any featured events), all on one user feed.

HERE'S HOW ARO WORKS:

CONNECT WITH PEOPLE, NOT PLATFORMS

ARO increases digital presence, overall brand awareness - creating authentic connections between restaurants and clients on one AI-powered platform *so you can focus on what truly matters - connecting, not posting.*

FOCUS ON HOSTING, NOT PROMOTING

We bring eager customers right through your door by putting you in front of *hungry eyes in the right place, and at the right time.*

SPEND LESS TO MAKE MORE

ARO is a free-use mobile app solely focused on increasing your restaurant's promotability and discoverability, *driving revenue rather than clicks and impressions.*

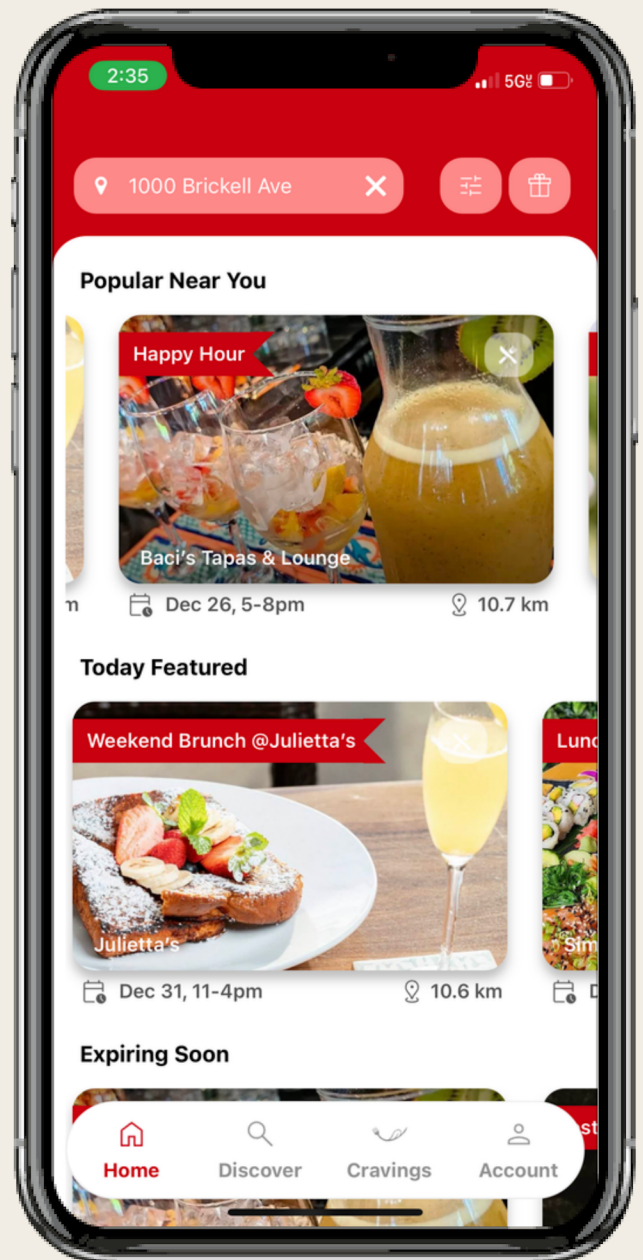

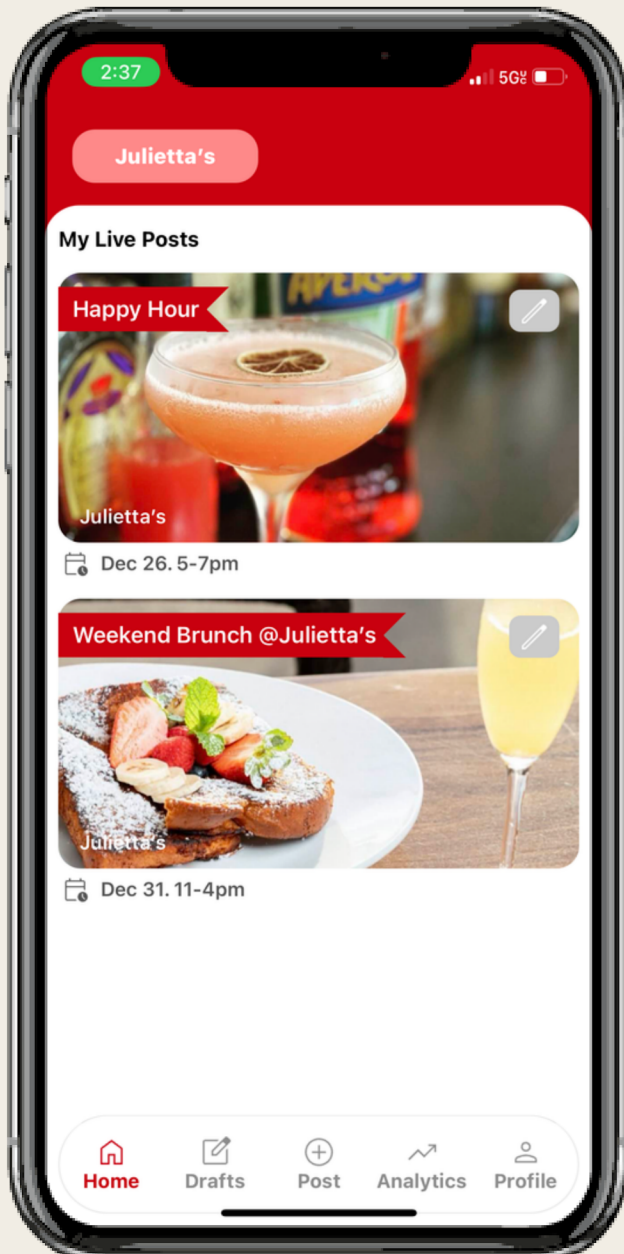

Let's connect!

CONNECT DIRECTLY WITH CUSTOMERS

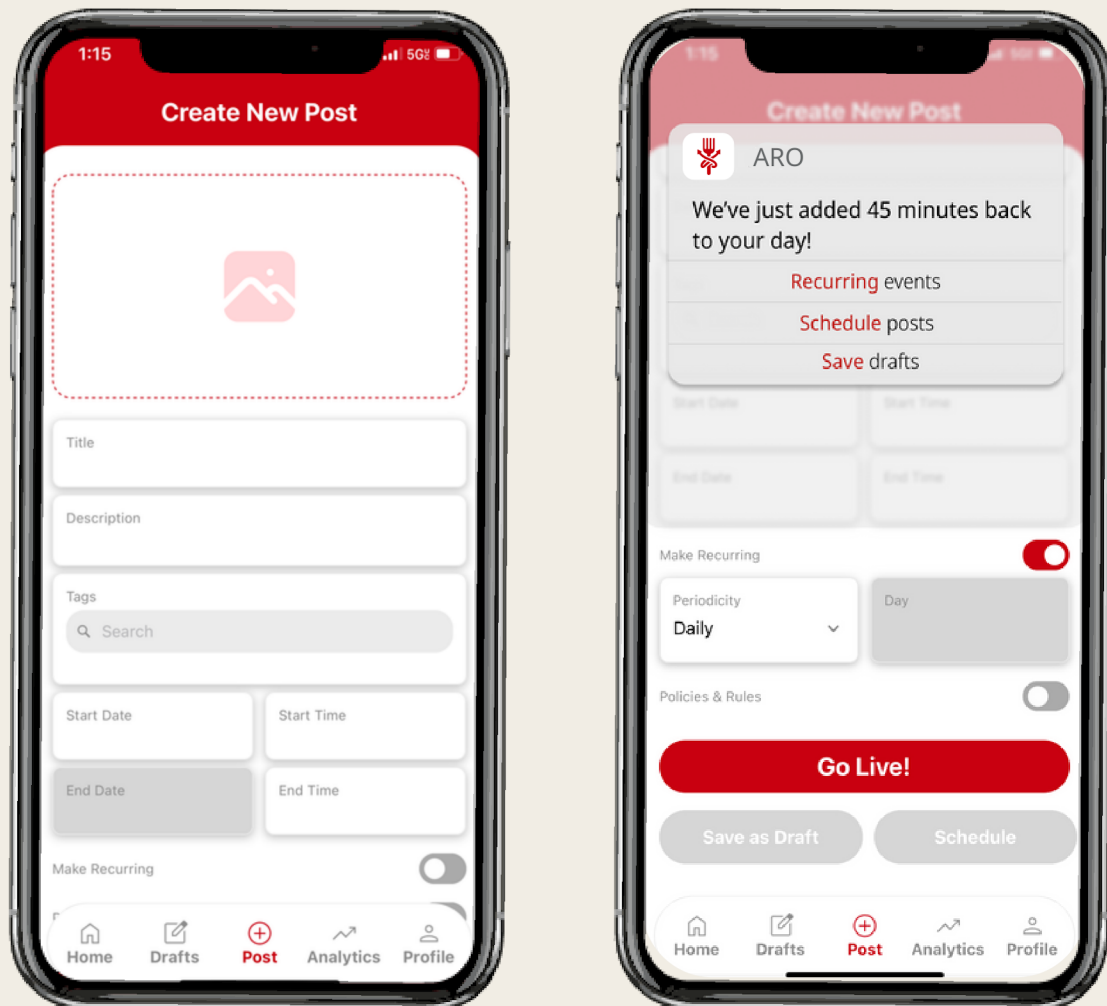

Images from ARO app - user feed shows promotions around them, tailored to their preferences. As a user, feeds are personalized to show restaurant offers according to their tastes and proximity.

The partner app showcases a different feed, one filled with their own content. On the partner feed, you can keep track of your past, present, and future promotions.

WE MAKE PROMOTING EASY, SO YOU CAN FOCUS ON HOSTING

The 'Create New Post' page is where you can create, save, and schedule promotions or events for your restaurant.

With ARO, simply post your already existing or new promotions and uncover a new era of discoverability.

*ARO's features create instant value with a hyper-focus on your most valuable asset - **time**.*

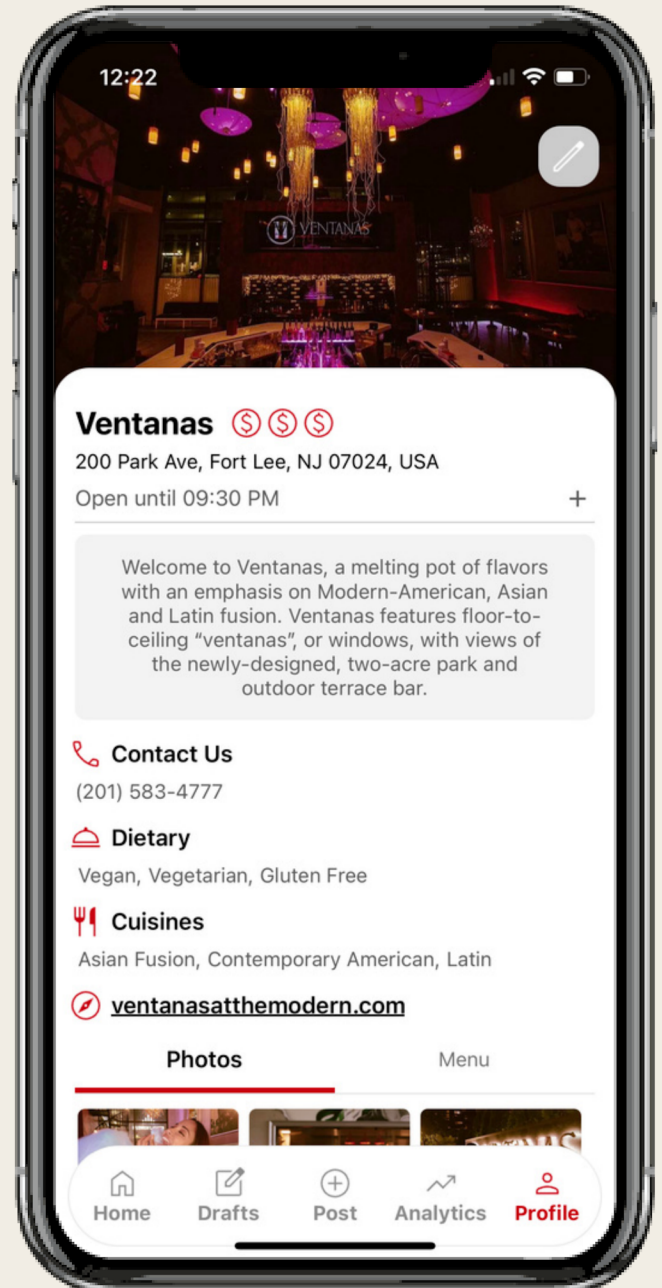

SPEND LESS TO MAKE MORE: ARO IS FREE

Your restaurant's profile serves as your homepage, where you can customize and include all relevant information for the user.

The temporary account to the right is a sample of how your restaurant will be showcased on ARO.

By being an ARO Partner, we get more eyes on you and more diners to your table.
